Introduction

AFT Coin is a crypto-currency token that is hosted on multiple Blockchain - BEP 20, Which is introduced by AFT Coin with a Max Supply of 100 Million, It allows cross-chain to the holders. AFT Coin provides high-end security on transactions while working on Binance smart chain-based Blockchain system.

It is open-source and decentralized, with consensus achieved using proof of stake. It has been launched with a strong focus on decentralization and scalability, and it enables complete privacy.

AFT Coin has a substantial Ecosystem around which includes Launchpad, Swap Exchange, NFT Marketplace, Gamefi, Exchange, and many other components to make the AFT Coin Network more efficient. So, AFT Coin is the most important part of the AFT Coin ecosystem.

www.alfatrex.org

MISSION

To try on unlocking AFT Coin potential and making AFT Coin easy to use.

To make AFT Coin market place with global reach.

To provide attention to the financial profits and safety of every single stakeholder.

To facilitate the ability of buyer-seller to transact a wallet in the most secure way.

VISION

To create a global AFT Coin marketplace where buyers and sellers can buy, sell and trade AFT Coin in most secured and trusted manner.

To solve current problems of customers in a manner that make their business easier.

Core Values

Be Magical. We are positive and kind above all else. Our main goal is to create happiness in other lives. Be Charitable We strive to be as giving as we can possibly be, helping out our community as much as we can. Be Sustainable We make decisions that are based on our long term health, not the short term gain. Be Transparent We strive to be open and honest with our community at all times, for the benefit of all.

Ecosystem

AFT Coin is a company that aims to bring innovation and novelty to the gaming, defi, utilities, nft, sports, forex and crypto trading sector through its Blockchain technology. The ecosystem of AFT Coin is very vast and broader as it is embedded with bsc that makes it more essential for the people associated with the agriculture and food sector.

Binance Blockchain Technology

A decentralized open-source Blockchain-based operating system with smart contract capability, proof-of-stake principles for its consensus process, and a cryptocurrency unique to the system, known as Binance is a decentralized, open-source Blockchain-based operating system (BSC).

Working of Binance Smart Chain

Binance is founded on a few essential concepts, the most important of which is decentralization. All data on the Blockchain is completely unfettered and is not under the jurisdiction of a central authority. Content creators can receive Binance in return for sharing their work. Additionally, developers can create their own coins on the Binance network. These tokens can then be used in the network's user-created decentralized apps (dApps). Binance main token is used to back the newly issued tokens. The network's ultimate step of development is to support Binance -based games. These games would be totally decentralized, with users rewarding authors directly if they enjoyed the game. Binance's consensus algorithm is referred to as delegated proof-of-stake. In this system, transactions are authenticated by 27 super representatives who are responsible for keeping the transaction history. Super representatives are picked every six hours and compensated with a Binance coin created by the system. Every three seconds, a new block is added to the Binance Blockchain.

Benefits of Binance

Transactions on the Binance Blockchain technology at Very Less Cost. Binance does not impose a fee for asset transfers. It assists sellers and buyers through its free transactions, promotes, and provides the optimal business environment. Rapid transactions The network can handle up to 2000 transactions per second. Scalability and the potential to revolutionize online media are encouraged by such transactional capacity. This is a major accomplishment compared to Ethereum (25 transactions) or Bitcoin (3-6 transactions). Creates dApps On the network, you can create dApps. You can earn digital assets by creating a dApp on the network and offering content on it. These can be in regular Binance you created Binance backs that. As a result, you may be compensated for your efforts in developing the app and its content. If you don't want to create your own dApps, you can still browse through the vast collection already created.

www.alfatrex.org

Supports Creators

Binance believes it is essential to support content owners more effectively, and a network is an amazing option. If you're a 2020 internet user, chances are you enjoy having to read digital content. Because content creators enable you to be happy while watching, it is only fair that they are compensated fairly for their efforts

Anonymous Transaction

Transactions on the Binance network are anonymous, but only on the network itself. The act of purchasing BNB and the requirement of using an exchange means that you will have to prove your identity to purchase Binance tokens in the first place. Transactions can, however, be carried out anonymously once on the network. On the other hand, it should be noted that all Blockchain keep a record of all transactions that take place on the chain. As a result, no transaction can ever be truly anonymous.

Safe

AFT Coin has a solid reputation in the cryptocurrency world. The amount of money spent by the company on security and the personnel it has hired demonstrates this. As with other cryptocurrencies, because it is a decentralized network, the individual bears a significant responsibility for safeguarding their tokens. In terms of the network as a whole, there has yet to be a security breach.

www.alfatrex.org

Proof of stake

Seeing as cryptocurrencies are decentralized and not controlled by banks, they require a way to verify transactions. Proof of stake is a popular method (PoS). Proof of stake is a consensus mechanism for cryptocurrencies. By staking their coins, cryptocurrency owners can check new transactions and add them to the Blockchain. This method replaces proof of work, the first cryptocurrency consensus mechanism. Proof of stake has grown in popularity as concerns about the environmental impact of crypto mining have grown. Proof of stake is critical for cryptocurrency investors. These are some examples of cryptocurrencies that use it. Owners of a cryptocurrency can stake coins and create their own validator nodes using the proof-of-stake model. Staking is the act of pledging your coins to be used for transaction verification. They are locked while you stake your coins, but you can unstack them if you want to trade them. When a block of transactions is ready to be processed, the proof-ofstake protocol for the cryptocurrency selects a validator node to review the block. The validator verifies the accuracy of the block's transactions. If this is the case, they add the block to the Blockchain and receive cryptocurrency as a reward for their efforts. If a validator proposes adding a block with incorrect information, they will be penalized by losing some of their staked holdings.

Why AFT Coin?

Zero Human Factor;-

The human factor is not taken into consideration. The smart contract is not dependent on anyone, and there is no way to prevent the platform from functioning.

Referral Provides ;-

There are no hidden fees, and all funds are transferred between members without any intermediaries. The contract balance is always a negative number.

Immutability of Conditions

Nobody has the authority to ban you from the platform because the contract does not contain a provision for such a restriction.

Decentralization ;-

Instead of having managers or administrators in charge, there are only creators who are members of the community on the platform, just like everyone else.

Instant Transactions ;-

Profits earned by other members are transferred directly into your personal wallet. There is no hoarding in the system, and all of your earnings are yours to keep.

Transparency and Anonymity ;-

Because the smart contract code is public, anyone can view the complete history of all transactions. This ensures that the conditions are pure and that the platform statistics are accurate.

What Is “Decentralization”

DeFi is a collective term for financial products and services that are accessible to anyone who can use Ethereum – anyone with an internet connection. With DeFi, the markets are always open and there are no centralized authorities who can block payments or deny you access to anything. Services that were previously slow and at risk of human error are automatic and safer now that they're handled by code that anyone can inspect and scrutinize.

- A global, open alternative to the current financial system.
- Products that let you borrow, save, invest, trade, and more.
- Based on open-source technology that anyone can program with.

Smart Contract

Binance Blockchain was designed to streamline communications. It ensures easy integration with a wide range of highly sophisticated programming languages. Binance is designed as a three-layered system. It consists of a core layer, storage layer, and application layer. Interestingly, each layer is optimized to perform a certain set of functions for a specific set of functionalities. It is the core layer that oversees the management of Binance smart contracts. Decentralized Finance or DeFi has emerged as the next-big-thing in the world. It has the potential to deliver better results to every single if implemented correctly. In a very short duration, this technology has shown strong prospects and already delivered some very impressive results to different industries. The DeFi Binance token is a new concept that is gaining a lot of traction and giving companies a chance to be more efficient.

➤ AFT Coin in e-commerce marketplace –

➤ AFT Coin Network

AFT Coin Global Network - AFT Coin an experienced organic product ecommerce company. It provides delivery service of fresh vegetables and fruits to the customers at their doorsteps by procuring all the produce from farmer's market every morning. This makes sure that customers get fresh produce every time they order. Procuring directly from farmer's market also reduces any intermediate costs and ensures best quality. The advantages of organic food are more based on perception than real facts. Much of this support of organic food as a healthier alternative comes from environmental groups who want to conserve the environment by avoiding pesticides and fertilizers. The producers of organic food strongly believe in the idea that organic food is superior to other types.

The organic ecommerce platform AFT Coin Network is being strengthened for directly linking farmers with retail as well as bulk buyers. Interest in cryptocurrency is growing, and fast. With some pretty major brands, marketplaces and payment processors announcing their adoption of crypto, this digital payment method is firmly on the radars of retailers across the globe. Whilst not everyone thinks the world is ready for cryptocurrency payments, it's certainly getting harder to ignore the impact that crypto and the Blockchain technology on which it's built could have on ecommerce. Whether you're an ecommerce merchant just dipping your toes into the cryptocurrency waters, or you're sold on the idea of crypto payments and are exploring how to accept them in your online store, it's important to keep on top of how this trend is unfolding. After all, awareness and understanding today could help forge a valuable opportunity for your business in the future.

AFT Coin E Learning Platform

E learning platform for farmers whom so member of AFT Coin Global Network –AFT Coin, Free access of e-learning system is available to any one interested in the field of agriculture and allied sciences. AFT Coin LMS is a platform that seeks to spread marketing information from experts and will build an educational marketing platform. The educational platform will be available to only AFT Coin LMS holders who can access content on tips and tricks from marketing experts. Digital Agricultural Learning- AFT Coin LMS are innovations that enable farmers and agribusiness entrepreneurs to leapfrog to increase their productivity, efficiency, and competitiveness, facilitate access to markets, improve nutritional outcomes and enhance resilience to climate change. These technologies range from mobile apps to digital identities for farmers to solar applications for agriculture to portable agriculture devices. DATs are increasingly becoming indispensable in the global food and agriculture sector, from fast and convenient information delivery to providing virtual marketplaces

OUR TEAM

The safety issue is very crucial in every field and can affect the condition of a business and its performance. The companies need to take steps to ensure safety around their files and the account of the employees working with important clients. To make sure that everyone gets the best services for getting safety in their work environment and personal level, AFT Coin is planning on hiring professional people who know everything related to the safety concerns that might arise in the business world. With the help of professional people, users can get the solution to their problems very easily and do not have to worry about their data. The data includes the work that has been done by the company or the employees which contains the details of the clients. It can be misused if it gets in the wrong hands which affects the reputation of the company.

It is a safe, speedy and mobile-based, digital and decentralized solution in the palms of your hands. This solution is capable of ensuring hassle-free access to your accounts. All in all, it is a true medium of decentralized payments. The main thing users will get is a global and competitive money transfer system. This system will have the ability to help exchange FIAT currencies as well as Cryptocurrencies and vice versa. AFT Coin is a cryptocurrency that will reward users for making payments in all walks of life. It has everything required to eliminate barriers in the way of worldwide adoption of cryptocurrency usage. Finally, in simple words, everything said in this whitepaper makes AFT Coin a safe and reliable decentralized currency and financial ecosystem ready for launch worldwide.
